

Call for tenders' details

Title: Study on impacts on resource efficiency of future EU demand for bioenergy.

Start date: 14/06/2013

Time limit for receipt of tenders: 09/08/2013

Contracting authority: European Commission, DG ENV+CLIMA

Status: Closed

Call for tenders question list

#	Submission date	Publication date	Question subject	Question	Answer
1	27/06/2013 12:45	01/07/2013 16:28	Question regarding the technical specifications - Task 3: Modelling of impacts	The objective of task 3 is to model the likely impacts of increased EU bioenergy demand. The modelling tools should be able to represent issues related to forest increment and biomes production. The model should incorporate the main tree species. How many tree species shall the model incorporate? Is it sufficient to distinguish between deciduous and conifer trees?	01/07/2013 In order to deliver on the objectives of Task 3, it won't be sufficient to distinguish only between deciduous and conifer trees. A more precise distinction should be made between tree species. It is up to the tenderer to propose the number of species that they would deem both relevant and realistic to include under this task, and to provide a justification for their proposal.
