Call for tenders' details

Title: Providing support in relation to the identification of approaches and measures in action programmes under Directive 91/676/EC

Start date: 17/07/2018

Time limit for receipt of tenders: 27/08/2018

Contracting authority: European Commission, DG for Environment (ENV)

Status: Closed

Call for tenders question list

#	Submission date	Publication date	Question subject	Question	Answer
1	31/07/2018 16:05	09/08/2018 12:15	Task 1: number of users for collaborative web application	In relation to Task 1, the tender specification document (page 17) stipulates that a 'collaborative web application' will need to be developed. Please could you provide an estimate of the maximum number of users for this web application? Thank you	**09/08/2018** The estimated maximum number of users for the duration of the contract is around 60.

#	Submission date	Publication date	Question subject	Question	Answer
2	02/08/2018 14:41	09/08/2018 14:17	Collaborative web application	On page 17 of the specification document, it states that either Confluence or MediaWiki should be used for the collaborative web application. We have two questions in relation to this: 1. Are we correct in thinking that which ever one is chosen it will be hosted in the europa server? (i.e. in relation to the Flexible Platform that is mentioned in the specification document). 2. If it is hosted on the europa server, the following page lists all the webtools that are available, and for Confluence or MediaWiki there are links for 'how to request' a Confluence or MediaWiki site (http://ec.europa.eu/ipg/services/interactive_services/index_en.htm). Thus, are we correct in thinking that the site would be setup by the Commission? (upon request) and then we manage the web application?	**09/08/2018** 1. The wiki solution chosen among those available at the Commission and offered in the context of its Flexible Platform will be centrally hosted by the Commission. 2. There is no need for the contractor to make a request via http://ec.europa.eu/ipg/services/interactive_services/index_en.htm. The Commission will create the site and the contractor will be given access in order to develop it along the lines described in the tender specifications (e.g. pages 16-18) and manage it with the guidance of the Commission services.
3	02/08/2018 16:35	09/08/2018 14:18	Collaborative web application: Confluence	In relation to my earlier question, does the Commission already have a licence to use Confluence, or do we need to add in the purchase of a licence to the cost of the project?	**09/08/2018** The Commission already has a licence to use Confluence. There is no need to add the purchase of a licence to the cost of the project.

#	Submission date	Publication date	Question subject	Question	Answer
4	10/08/2018 11:38	13/08/2018 10:13	Electronic copies of submitted documents	Point 3 in the invitation to tender stipulates that tenders must be submitted "exclusively on paper" and no reference is made to including electronic versions on a memory stick or CD. Please could you confirm that you do not want electronic versions of the tender documents included within the submission?	**13/08/2018** The tenderers can include a memory stick or a CD if they like to do so.
