The tender specifications state that no abstract methodologies are desired, however, methodologies inevitably depend on the subject (which is not given). Section 3.5.1 Technical evaluation of tenders seems to suggest that data collection and processing is not to be part of the scenarios as that is marked seperately.	**01/04/2019** The requested scenarios should detail the organisation of work proposed by the tenderer for the preparation of a 10-page file note and a 50-page report requiring a questionnaire. It is up to the tenderer to choose how to best demonstrate the scenarios. The subjects covered by this call for tenders are indicated under paragraph 2.3 of the technical specifications. Paragraph 3.5.1. describes how the quality criteria will be marked
