Call for tenders' details

Title: Study on the Creation of a CMU Indicators Dashboard

Start date: 29/07/2019

Time limit for receipt of tenders: 20/09/2019

Contracting authority: European Commission, DG Financial Stability, Financial Services and Capital Markets Union (FISMA)

Status: Closed

Call for tenders question list

#	Submission date	Publication date	Question subject	Question	Answer
1	21/08/2019 14:54	23/08/2019 16:49	CMU indicators	Is it necessary that all the indicators pass the validity test? If yes, what are the criteria used to evaluate the indicators (e.g.: which level of significance used as threshold)?	**23/08/2019** The indicators must not necessarily pass a 'validity test'. The criteria used to evaluate the indicators is part of the methodology that the contractor can put forward in the technical offer and should develop in detail as a key part of the study.
2	21/08/2019 15:11	23/08/2019 16:52	Task 3	Can the empirical analysis be developed in R?	**23/08/2019** Yes, any software can be used for the econometric analysis ans long as the underlying methodology and parameters of the model are fully described.

#	Submission date	Publication date	Question subject	Question	Answer
3	21/08/2019 15:08	23/08/2019 16:54	Task 2	Is the use of every not publicly available database listed on task 2 necessary?	**23/08/2019** No, it is not necessary, but all indicators have to be sourced by public or from any of the proprietary datasets listed in the tender specifications.
4	21/08/2019 15:07	23/08/2019 16:58	Task 2	How many indicators per dimension of the key CMU objective (listed on section 3.1) are expected?	**23/08/2019** There is no specific number in the tender specifications. We would expect the tenderer to give a first indication in the offer and then make a more in depth analysis (for the identification and selection of the indicators, as requested in the tender specifications) in the first phase of performance of the contract.
5	04/09/2019 12:43	04/09/2019 15:01	Task 2 - List of external databases	Can we consider additional proprietary databases (i.e. databases not listed on page 20)?	**04/09/2019** Additional proprietary databases (to the ones listed in page 20) may be considered by tenderers. Please note that, considering the replicability requirement (i.e. possibility to update the indicators), it would imply that this additional data would require to be made accessible to the Contracting Authority for the purpose of this study.

#	Submission date	Publication date	Question subject	Question	Answer
6	04/09/2019 16:37	06/09/2019 12:17	Task 2 - Use of proprietary databases	The licence terms of many proprietary databases do not allow one to share individual data points from the database(s) with a third party. Can we assume that EC DG FISMA has or will get their own access to these databases for future updates of the CMU dashboard	**06/09/2019** For the deliverables (intermediary and final) under the service contract to be awarded under the present call for tenders FISMA/2019/045/B, all costs with access rights to proprietary databases are to be supported by the contractor. For all future updates, the costs are to be borne by the Contracting Authority, subject to adoption of budget and availability of financial resources.
