1	11/01/2021 09:43	21/01/2021 11:02	Inflatable Offshore Booms for oil spills	It's very difficult to manufacture an oil boom of vulcanized neoprene material that would fulfill the required maximum total weight per meter and the required buoyancy to weight ratio. Would it be acceptable to provide an oil boom manufactured of PU/PVC material that would fulfill all other requirement except for the material (neoprene)?	21/01/2021 Please refer to the published Clarification No. 1

2	11/01/2021 13:24	21/01/2021 11:03	ITEM 5 - Skimmer with Hoses	We ask you kindly if a proposal concerning a four drum skimmer (type smooth drum) with hydraulic power pack and transfer pump on board is acceptable. We have reasons to believe that this proposal at a highly competitive price could bring a lot of advantages for the following reasons: - High capacity of recovery (1-2% of recovery product is watery when the oil layer is discontinuous, when the layer of oil is continuous. - Up to 50 m3/h of recovered oil, free water collected < 2% - Reduced maintenance requirements - Easy handle due to the little dimensions and lightness. It can operate without the presence of operators	21/01/2021 Please refer to the published Clarification No. 1
